

Asset Management Plan Overview

CE: None

OE: None

This no cost, one-day training class, organized by the Tennessee Association of Utility Districts in collaboration with the Tennessee Department of Environment and Conservation, is designed to guide participants through the development of an Asset Management Plan (AMP) that meets the requirements of the American Rescue Plan Act. The training will cover the key standards and criteria outlined by TDEC for AMP development, specifically focusing on ensuring eligibility for reimbursement under the ARPA funding provisions. Attendees will gain practical insights from TDEC and TAUD personnel on how to create a comprehensive and compliant AMP that aligns with both federal and state guidelines for utility districts.

2025
