Successful completion of this workshop will renew your backflow/cross-connection certificate for three years.

Certificates for Backflow Preventer Testers must be renewed every three years. If you hold this certificate, it is your responsibility to attend a renewal class before the expiration date on the certificate. Not renewing by the expiration date may jeopardize the acceptance of your test reports by the Water Provider. Requirements overview and testing procedures will be covered

You must successfully demonstrate that you can test a reduced pressure principal assembly and a double check valve assembly in accordance with recognized TN Department of Environment and Conservation procedures without written or verbal assistance. Bring your backflow test gauge if available.
